To: The Texas Senate Education Committee  
From: Steve Swanson  
May 19, 2011  
Reference: SB 1386 Youth Suicide  
Testimony

**Community-Based Leadership First**  
*Existing In the Texas Education Code*

Good morning my name is Steve Swanson and I am here today as a citizen. My wife Lonni and I have raised our two sons in Texas.

My background includes architectural and structural engineering; ownership in a business that designed and built buildings, including many schools and higher education facilities; serving on school and district committees, workforce development, and with elected officials on community boards; and serving in communities (rural, suburban, and urban) with at risk youth and schools.

This experience has clearly revealed we lose efficiency, effectiveness, lives (suicide, dropouts), money, and the ability to compete in the global economy when people in our communities do not talk and work with one another and truly solve problems together as a community.

The success and lives of all our children is critical and urgent for the success of Texas

**Leadership must come first.**

Leadership:

- Focused on the success and life of every child, our future workforce, businesses, and economy.

Leadership:

- That is committed to, encourages, and helps people in our communities seek ways and processes to truly work with one another to efficiently and effectively use our resources, human and financial.

Today, everyday, we all have leadership opportunities and responsibilities to help our communities imagine and create the possibilities for the future of our children and economy.
This Requires Action – An Opportunity for Leadership Today

To all Texas legislators:

Please call people in the school districts you represent to:

- Let them know you are committed to helping them truly work with one another
- You are going to visit with them soon to help them
  - Come together,
  - Seek ways and processes to establish working relationships and improve,
  - Make efficient and effective use of community resources,
  - Serve the needs of all students,
  - Meet the needs for a competitive workforce, businesses, and economy.

Please ask other legislators to do the same.

In June of 2011 call each other to share what you have learned about people working together for their children in the school districts you represent.

Start the State of Texas Learning Community for Youth

Ask the TEA to help you.

Each community shares with each other their youth suicide stories and change that has impacted their lives.

This is not a new idea.

Support and encouragement for your calls, visits, and action is included in the Texas Education Code, as well as many other references. See attached.

In the midst of crisis,

For the sake of our children’s future and liberty,

We must not and will not retreat.

Thank you for your courage, commitment, and leadership with and for our communities and the future lives of our children – the future of Texas.

Steve Swanson

Education and Community – Working Together

“The deep purpose of Public Education is learning to work together”
Robert Sylwester, Emeritus Professor of Education, University of Oregon

Council’s Report to the Governor – June 2008
State of Texas - Governor’s Competitive Council

“In order to improve Texas talent development outcomes, the Texas system should transform to remove bureaucratic policies that prevent all parts of the system from working seamlessly together to meet workforce demand: ensure that all students graduate with the skills required to be college and workforce ready…”

“...Institutions of higher education must make partnering with private entities easier.”

Texas Education Code (TEC)

“...The commissioner shall oversee the provision of training and technical support to all districts and campuses in respect to planning and site-based decision-making...The agency shall conduct an annual statewide survey of the types of district- and campus-level decision-making and planning structures that exist,...” Sec. 11.254

“The board shall:...seek to establish working relationships with other public entities to make effective use of community resources and to serve the needs of public school students in the community; ...adopt a policy to establish a district- and campus-level planning and decision-making process...” Sec. 11.1511

“The board of trustees and the superintendent shall work together to create and support connections with community organizations to provide community-wide support for the high achievement of all district students...” Sec. 11.1512.

“...establish a school community partnership team...” Sec. 39.103.

Reclaiming Public Education by Reclaiming Our Democracy – 2006
David Mathews – By the Charles F. Kettering Foundation

- “Citizens joined with citizens are able to accomplish what no school board, superintendent, principal or cadre of teachers can do alone.”
- “…public work creates the public... public building is done through public work”
- “I am simply referring back to “the Public” that is implied in the phrase, “We, the People.”

Creating a New Vision for Public Education in Texas- May 2008
TASA – Texas Association of School Administrators/Texas Leadership Center

- “The schools we need are community-owned institutions”
- “This work can be used to create a community-based, bottom-up movement capitalizing on new and existing alliances with professional organizations, local business leaders, and similar groups. To quote author Margaret Wheatly, ‘All great things begin with a conversation between two people.’…”
- “Why a New direction and Why Now....The core business of schools is to provide engaging, appropriate experiences for students so that they learn and are able to apply their knowledge in
ways that enrich their lives and ensure their well-being. Unfortunately, the present bureaucratic structure has taken away that focus and replaced it with a system based upon compliance, coercion, and fear. If proper focus is to be restored, the system must be transformed into one based upon trust, shared values, creativity, innovation, and respect.”

- “Transforming Our Schools from Bureaucracies to Learning Organizations. Bureaucracies value power and authority, while learning organizations are driven by beliefs and values... Learning organizations maintain a clear sense of doing the right thing and doing it well, shared commitments and beliefs, common purpose and vision, trust, accountability, and use of standards to inspire. Bureaucracies discourage and are disruptive to innovation...”

- “Saying No to Remote Control. The shift in power in setting education policy from the local to community to the state and federal government has resulted in a system where schools feel more accountable to the Legislature than to their students and their communities.”

- “In this context we see...
  - Schools that foster a sense of community, where local citizens know that the schools belong to them and they are responsible for the quality of education and creating the community conditions in which great schools can flourish...
  - Acceptance of the fact by schools and communities that the lack of success of many students today is less a problem of the students than of the systems that define current schools and the communities in which they function.
  - Schools that embrace their (school board members, in particular) fundamental role in building the communities needed for great schools”

- “A Moral Imperative: Why We as Public Education Leaders Must Speak and Act Now...Our collective experiences and our intensive study of what is happening in our schools and communities lead us to conclude that the future of public education is at risk and will not survive if the present direction continues. It is time to redirect the concern, energy, effort, and support for improvement to create a positive commitment to the education of our youth by transforming systems that better meet the needs of 21st century learners.”

- “Organizational Transformation...Excellence emanates from a shared commitment to values and standards, high levels of engagement, and strong leadership at levels functioning with and accountability system that inspires.”

- “Schools reflect the problems in the society from which their students come, therefore, it is essential that community/school partnerships be developed and supported that coordinate services to student and families.”

_The Mystery of Good Teaching_ – 2002 Quote from CAN Education Assessment Overview, Austin - Travis County Texas, based upon Goldhaber, D. (2002) The Mystery of Good Teaching\r

“In fact, some studies have concluded that only 40% of educational achievement can be attributed to factors within the education system the remainder is a function of other individual, family, and community conditions.”

**Imagine**

What would happen if all our youth saw and experienced all adults truly seeking and establishing working relationships with one another to make effective use of community resources and serving the needs of all students for their success, future workforce and businesses, and a vibrant economy?

People together, overcoming the loss of life and money which results when we separate from one another, do not communicate, and are divisive.

“Obesity, poor education make many younger people unfit for military.”
Our national security is at risk.

*Mckinsey & Company Social Sector Office* — 2009
“Educational gaps impose on the United States the economic equivalent of a permanent national recession”
Dr. Nolan Estes  
Professor Emeritus, College of Education, University of Texas

- “All education ought to be career education... help students be successful at the next stage regardless of what that is.”
- “Currently “We have a cage for every age”
- “Teachers must become guides on the side vs. a sage on the stage... work with and relate to vs. lecture and cover the book.”
- “We must eliminate the 2 X 4 X 6 curriculum i.e. what is between the two covers of the textbook... the 4 walls of the traditional classroom and the 6 periods of the traditional class day and move to real world experiences.”

Education and Economy for Our Future

Council’s Report to the Governor — June 2008  
State of Texas - Governor’s Competitive Council

- “Ensuring the state has a high-quality education and workforce system is essential to state’s future prosperity.”
- “Texas is expected to experience critical workforce deficits in both higher education graduates as well as graduates from quality training and certification programs in nearly every industry cluster. Stakeholders across the state warned that if the state’s talent development system” (education and workforce development system) “…does not make critical changes at every level to ensure a dependable workforce is available, Texas will not remain a high-quality place for doing business.”
