What are you all doing to make it safe and accessible for myself and others who live far away to share our testimonies with committees on bills during this legislation?

In Texas; Harris County, Dallas County, the cites of San Antonio and Austin have declared racism a public health crisis. During the COVID-19 pandemic alone, we have seen how the disease has disproportionately affected the Black community in the workforce, in the healthcare they receive, and the barriers to vaccines. What are members of the senate actively doing to dismantle systemic racism? Will redistricting further perpetuate systemic racism?

Thank you for your time.
