Message:

Redistricting is absolutely essential for Texas. US citizens have been pouring into Texas for years and it important that they are taken into account. The redistricting efforts only reflect population increases and aim to fairly represent shifts in location of increases of "legal" citizens. The US west coast (California) and northeast (particularly New York) are losing legal population by the thousands and are moving to states like Texas, Florida and Tennessee. Most are fiscal and political conservatives and their voice deserves to be heard. Please continue your efforts to push through these long overdue revisions to the districts. Texas citizens are counting on you.
