Message:

Please be advised that I am deeply concerned that the governor has caved to the wants of the WH to redraw Texas Congressional Districts, carving out additional votes that would benefit the WH agenda. This is a complete disregard of districting maps dependent on the population outcomes of the end-of-decade census.

Texas residents of one area will run the risk of being moved to a district with little in common with their own. To manipulate Texas voters for political expediency is inexcusable.
