Message:

It's simple. Democrats won between 42.5 and 44.6 percent of the vote in important statewide races in the 2024 election. Democrats are at the very least 42.5 percent of the voters. Therefore, in an ideal, unrigged democracy, about 42.5 percent of the Texas Delegation in the US House of Representatives should be Democrats. This proposed redistricting violates the fundamental spirit of democracy, and I strongly, strongly oppose it. The current gerrymandered map already is something less than democratic. Already, a large number of Texans (and Americans in general) believe the current democracy is a sham. Let's not make matters worse through a naked power grab, please. Thank you.
