

DAWN BUCKINGHAM
STATE SENATOR

Statement on Senate Bill 312

As a promoter of a fiscally responsible limited government, I believe Texas craft brewers should have the right to sell beer and ale to consumers for off-premise consumption, a privilege the state already provides to wineries, distilleries and brewpubs in Texas.

Senate District 24 is home to many craft breweries, and with Texas being the only state in the country that does not permit off-premise sales at production breweries, I have filed SB 312 to encourage further economic development in my Senate District and to eliminate this unnecessary government overreach.
