Senator José Menéndez Issues Statement on Mandating COVID-19 Vaccines

San Antonio, Texas - State Senator José Menéndez issued the following statement on Mandating Vaccines

Senator José Menéndez released the following statement:

"This morning, the United States Food and Drug Administration (FDA) fully approved the Pfizer vaccine for people age 16 and older. While there is consideration for many companies and agencies to mandate vaccines, the Pentagon has stated that it will require service members to receive the COVID-19 vaccine, now that it is fully approved. Having this requirement in place creates safer spaces for people to work and learn. I fully support any agency or company's decision to mandate vaccines, especially when they have proven to save the lives of those who have contracted COVID-19 and prevent people from extreme illness. It is important to encourage everyone who has not yet been vaccinated to do so, and take other necessary steps to protect the lives of others."
